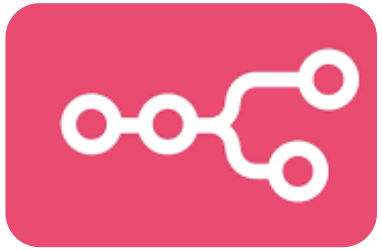
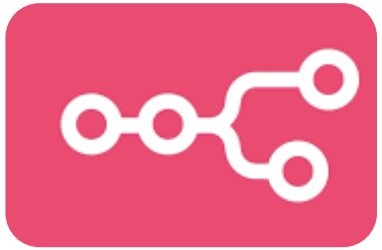
TechZeen

00

What if one small action could automatically trigger a full workflow? 💡



📌 What is Data Flow?



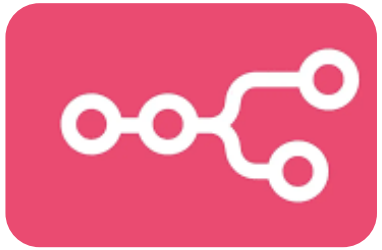
TechZeen

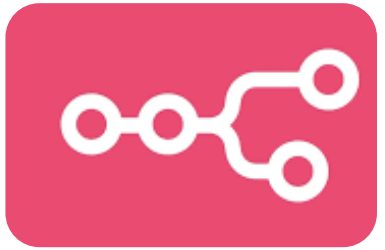
02

- Data Flow means how data moves from one step to another
- In n8n, data flows from one node to the next
- Each node receives data, processes it, and passes it forward.

📌 What is DCI?

(Dynamic Content Injection)





- Dynamic Content Injection means using real data instead of fixed text
- Content changes automatically based on input data
- Data is pulled from previous nodes and inserted dynamically
