

**Want to automate real apps without sharing your password? 🗝️🤖**

A brown key icon with a circular head and a notched blade.

# What is OAuth in n8n?

- OAuth is a secure login & permission system
- It allows n8n to access other apps without sharing your password
- Used to connect apps like Google, Gmail, Drive, Slack, GitHub
- Access is given using tokens, not passwords

# ? Why is OAuth important?

-  More secure than username & password
-  Password is never stored in n8n
-  Access can be revoked anytime
-  Trusted & required by big companies
-  Needed for most modern APIs
